Part 4

Tips and Tricks

There are a whole bunch of additional charting tips, some that apply no matter how we chart and some specifically for charting on paper or in the computer.

There are suggestions for representing new knitting operations, on paper or in the computer.

If we want to chart in the computer, we have several software choices. We'll walk in detail through some of the options if we want to use our word processor.

If we started charting on ordinary lines in our word processor, then figured out that we really, really ought to have used a table, there's a relatively easy way to convert the existing chart without inducing carpal tunnel syndrome.

The final chapter catalogs all the symbols in the knitting font, including alternative meanings used in this book.
