## Notes

Started off as a Nalgar, then switched to saddle sleeve. Both looked horrible on me.

Finally worked as a raglan with K2tog, SSK at the decrease points.

The K2tog-SSK decrease order makes a kind of ditch.

Weaving the underarms makes it truly seamless. The sleeve is at the top, the body at the bottom. Notice EZ's phony seams on both to help with laying out the sweater after washing. The fabric automatically folds at the "seam" lines.

The grafting is perhaps in the burgundy color just below the sky blue. Or thereabouts.
